Re: Water Flushing Program 2017

Date: 10/13/2017

From: **Gary E. Phillips, Village Administrator**

CC: Mayor, Council, Police Department, Fire Department, Water Office

The Village of Leetonia Water Department will be starting the water distribution flushing program on Tuesday, October 17, 2017. This is due to the increase of recent complaints of discolored water.

When this flushing program is completed, customers should see an improvement in the water quality. It should also help reduce any stir ups that normally occur in the system on high use days.

The program should take approximately 2 to 3 weeks to complete. Customers are asked to use caution during the flush program due to the fact that the flushing is expected to cause lower water pressure and discolored water that may cause staining problems.
